● Trash & Debris Skimmers ● Aquatic Harvesters ● Crane Boats ● Dredges ● Oil Skimmers ●

- **Alpha Boats div. of Barber Welding Inc has been in business since 1948. The company was incorporated in 1967. Ernest Barber was the founder and my grandfather.**
- **Our harvester incorporates moveable paddle wheels for transportation. Removing the paddle wheels is not necessary.**
- **We are the only manufacture which keeps all items mounted on the hull. (Bridge, engine, hydraulic tank, fuel tank.)**
- **Our discharge conveyor hydraulically moves up and down, not welded in place like competition.**
- **Entire front intake head pivots like a swing, to minimize damage when inadvertently coming into contact with an object.**
- **We furnish a Stainless steel fuel tank not plastic or rusty steel as our competitors do.**
- **Our complete metal skids on the bottom of the hull are much more resilient, not wood which holds debris and rots off like our competition.**
- **All hydraulic hoses have JIC fittings that are worldwide available, not special fittings like our competition.**
- **The very front flares have plasma cut oval holes to let water out. Our competition has solid flares creating more drag.**
